DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 71-76, 80, 83, 84 and 87, drawn to a goods dealing apparatus, classified in class 705, subclass 27.
- II. Claims 77, 78, 82, 85, and 89, drawn to an apparatus for cross dealing and tracking of arrival information, classified in class 705, subclass 7.
- III. Claims 79 and 86, drawn to a method of determining the cost of goods including distribution costs, classified in class 705, subclass 400.
- IV. Claims 81 and 88, drawn to a system for clustering buying and selling information, classified in class 700, subclass 11.

The inventions are distinct, each from the other because of the following reasons:

Inventions I. and II. are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II. has separate utility such as cross dealing and tracking of arrival information. See MPEP § 806.05(d).

Inventions I. and III. are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III. has separate utility such as determining the cost of goods including distribution costs. See MPEP § 806.05(d).

See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above, because the search required for each Invention is not required for the other Inventions, and because the inventions have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
